Keep your video files on the desktop. Just import them into your playlists with one click. Multiple users can edit and view playlists simultaneously. The program can run in the background with full functionality and no window. You can create custom rules for playback. For example, you can set the program to only play files larger than 50MB or with a specific filetype. This can be set for each playlist or used as a global rule. You can also adjust the playlist order and take pauses. You can also set the index number for each file, so your files are properly named. This program creates hotkeys to adjust volume, brightness, contrast and all other parameters. You can use the Hotkey settings to control your external video player. These hotkeys are saved and can be used on all playlists. Using keymacro, you can create hotkeys for various actions and you can easily use them in your VJs, games, movies, audio CDs and more. For example, you can easily have your computer control the track in your CD player or DVD player. You can use keymacro to set a hotkey for the timer in your VJ software. KEYMACRO will work on Windows 98, ME, 2000, XP, Vista and 7 and can be used on computers with or without the Terminal.
