Programming: AutoCAD includes several high-level programming languages. AutoLISP supports programming in the Lisp programming language. Visual LISP (a form of Lisp) is also available. AutoCAD R14 is the first version of AutoCAD to support Visual LISP. Visual Studio.NET is used to develop VBA scripts, add-ons, and .NET code. There are also various programming libraries available for programming in C++, including the Autodesk Developer Network (ADN). Other languages include C, Python, Java, Ruby and other scripting languages (e.g. AutoLISP, AutoJS). All of the files in the old folder are similar with same title in the last line. All files in the new folder also have similar title but with another line in the end of the file. For example: old\_folder file\_1.tif file\_2.tif file\_3.tif new\_folder file\_1\_new.tif file\_2\_new.tif file\_3\_new.tif How can I rename them with a batch file? Thanks A: This batch file should do it: @echo off setlocal EnableDelayedExpansion for /F "tokens=\*" %%a in ('dir /b "old\_folder"') do ( echo %%a | findstr "file\_" >nul && ( ren "%%a" "new\_folder\%%a\_new.tif" ) ) If you want to set the old\_folder/new\_folder variables and use them in the rest of the batch code, use set instead of setlocal EnableDelayedExpansion and end the batch with exit /b 0.
