Easy List [32/64bit] (Updated 2022)

Easy List is a lightweight Adobe Air-based application whose purpose is to help you keep track of multiple shows with the aid of a straightforward organizer. Clean feature lineup The utility sports an intuitive design that allows you to access a dashboard that contains at-a-glance information about the latest added entries to the database (name, title, date, rating, location, and number of CDs), total number of shows, items included in the My Top 10 list, as well as Coming soon shows. A search panel is included in the main panel for helping you perform searches by artist, city, song, state, country, or venue. Add multiple shows Storing a new show in the database can be done by providing information about the date, artist, title, venue, city, country, number of discs, media type (CD, DVD, VHS or tape), quality, generation, and comments. In addition, you can assign ratings and drag and drop artwork directly in the primary panel of the tool. Easy List is able to generate a list, so-called My Shows, with all the entries added in the database and lets you filter the information by artist. Plus, you can opt for a thumbnail or detailed list view mode. Extra tools to play with The application gives you the possibility to export data to DOC file format, while allowing you to select the items that are included in the output document, such as artist, title, date, city, comments, and country. Last but not least, you are offered the freedom to create lists with shows that you want to watch. Bottom line All things considered, Easy List delivers a simplistic approach for helping you add, view, search and rate your shows, and is suitable especially for beginners. On the downside, it doesn't offer support for manual and automatic backups of the database. Easy List Description: Easy List is a lightweight Adobe Air-based application whose purpose is to help you keep track of multiple shows with the aid of a straightforward organizer. Clean feature lineup The utility sports an intuitive design that allows you to access a dashboard that contains at-a-glance information about the latest added entries to the database (name, title, date, rating, location, and number of CDs), total number of shows, items included in the My Top 10 list, as well as Coming soon shows. What's New In?

Apps Script is Google's own service that enables you to connect your web apps with a full range of Google resources, such as the user interface, Calendar, contacts, and more. The official name of Apps Script is Google Apps Script. With this tool, you can automate your day-to-day tasks by designing scripts that can be accessed via the web and run from any location. Accessible API Apps Script provides a comprehensive set of APIs to access various Google resources and has a method that allows you to receive responses back from the system in the form of objects. Elemental This application tool includes an object browser to keep track of your objects, which is suitable for accessing online data from Google Docs, Sheets and Slides. Spreadsheet control for Google Sheets The spreadsheet control allows you to adjust various parameters of an active Google Sheets spreadsheet and it also offers options for creating table data. Objective Google Apps Script is suited for applications that require you to connect to the services, and to manage data in them. The developer has to use various object types, such as Drive file, class, method, range and user. Features: All the Data to Help You View Your Music Looking for a means to explore the data in your music library? What about searching through it by album or song? There are multiple apps out there that can help you with this. However, they also come with their own limitations and drawbacks, some of which you might not be aware of. So what about an app that's geared towards creating a simple, straightforward database of your music? If you've ever tried to keep track of multiple shows with the aid of a spreadsheet, you'll know how long it can take, especially if you've got thousands of albums and tracks in your library. Luckily, there's an app out there that aims to make life easier, in the form of Lista Easy. This Adobe Air-based application was built to help you create a database of your music with the aid of a straightforward organizer. In other words, Lista Easy is a lightweight Adobe Air-based application whose purpose is to help you keep track of multiple shows with the aid of a straightforward organizer. Clean feature lineup The utility sports an intuitive design that allows you to access a dashboard that contains at-a-glance information about the latest added entries to the database (name, title, date, rating, location, and number of CDs), total number of shows, items included in the My Top 10 list, as well as Coming soon shows. A search panel is included in the main panel for helping you perform searches

by artist, city, song, state, country, or venue. Adding multiple shows Storing a new show in the database can be done by providing information about the date, artist, title, venue, city, country, number

System Requirements:

-Windows XP/7/8/10-9GB RAM-2GB Hard Drive (3GB or above recommended)-2 GB free space-Graphics: 1GB DirectX 9/10/11-Razer Naga Speed-Internet connection for online play-*For the OSX platform: Apple OS X 10.6 or higher is required*
