What's New In?

iPlayerDownloader is a simple utility that allows you to download BBC iPlayer programmes to your iPod/iPhone. This application was created as a result of the severe issues that many customers and developers have had with the BBC iPlayer DRM on their devices. You can save each programme in a file with the actual filename of the programme, not a number, to facilitate the use of the files in any way you want. iPlayerDownloader also allows you to select a programme to watch online. It has many features to help the user. iPlayerDownloader is free. Simply download and launch the application, follow the onscreen instructions and your BBC iPlayer programmes are saved to your iPod/iPhone. What's New in Version 4.0.3: It's mainly a bug fix release, but there are a few minor improvements too. For example, it's now easier to enter the search term when you are trying to save a programme. New in Version 4.0.2: Thanks to the users who have given feedback, there are a few small enhancements and bug fixes in this release. For example, the programme image is now shown when the programme is being played. New in Version 4.0.1: A few bug fixes in this release. New in Version 4.0.0: This is a major rewrite of iPlayerDownloader that adds lots of new features, stability improvements and bug fixes. However, the interface looks a little different but will be far more user friendly. Uninstall Downloading Welcome to M3M Editor!
