The space travelling animals board the Space Ark and fly across the galaxy on a mission to repair the damaged worlds. At each planet your Arkonauts must bounce in the air and bag DNA combos, power-ups and all the fruit they can catch so ultimately inhabitants can return. About The Indie Developers League: THE Indie Developers League is committed to empowering the Independent Developers of the world to flourish. About Twinmotion Games: TWINMOTION is a small independent game developer based in Wolverhampton and with a diverse and talented team of self-taught and tenured game developers. They are dedicated to creating innovative, interesting and fun games that have a strong narrative and complex gameplay. Do you like space games, retro arcade gaming, puzzle games, indie games, retro NES, arcade racing, and galactic arcade? Well, your prayers have been answered! A space games developer called Twinmotion have announced their first game and it's incredibly fun. Space Ark is a long-running tradition in video games. It was originally a coin-op arcade game that many of you may be familiar with from the late 80s. Space Ark is all about navigating a "space ship" and collecting fruit. But, this game has been updated and made into an indie game for your iOS devices. And, I promise this game isn't a remake/reimagining. Space Ark was actually released in the early 90s, so this is an awesome new discovery that's been sitting in the indie world for quite some time now. Space Ark is a fun racing game which has a retro arcade theme to it. You can bounce on a planet and shoot a ball with a moving power-up to create combos and bring in speed. There is a lot to do in this game, which includes avoiding obstacles, meteorites, pirates, and other balls. Each planet is full of challenges and retro arcade gameplay that makes this game fun and intriguing. Let's dive in and take a look. First of all, there are 12 planets to explore and complete in this game. As of the time of this post, there are only 4 planets available for you to begin with. However, there will be a new planet available each time you complete a challenge on one of the previous planets. You can also get more gems and fruit on each planet. When you first begin playing Space Ark, you have to complete a tutorial on how to play the game and how to complete the various planets. There will be a few videos to watch

What's new:

**** Twelve inches away from his nose the fly buzzed feverishly. Its menacing buzzing awoke Skid instantly and he sat up in bed reaching for the phone in the dark. I've gotta get something for that buzz, he thought. He switched on the bedside lamp and picked up the receiver putting it to his ear. No dial tone, he was about to hang up when he heard the phone ring at the other end. He had to push several buttons on the phone before he managed to speak. "Hello." "Hi, Skid. This is AI at ABC-TV. Hope I'm not calling at a bad time, but are you in a position to talk about that story of yours?" Skid looked at his watch. It was 2.15 a.m. "Yeah, AI, what is it?" "Late last week we shot the following teaser for next week's pilot. You know, a preview of your story? We want to quote from your interview on the show about the suicide of the guy who did the 'Movies are for aliens' thing. And we were wondering if you can talk now?" "Well, yeah, I guess, but right now I'd rather talk to you than anyone else, and I mean that AI." "Great. The producer has had a note of your number and we read you here. Is it okay if we call you again tomorrow?" "Yeah, sure, AI. Call me anytime day or night. I'll think about what I could say." "Is there anything you could say we don't know?" "No, I don't think so." "Great. Well, that was what I wanted to know. You take care, OK? And call us tomorrow." When the line went dead, Skid sighed, switched the lamp off, and sat on the bed listening to the sounds in the room and thinking about the night before. On the cinema screen he had seen a life-sized projection of himself. And the effect was weirdly real. It was like watching someone else. Like seeing the view-master view of yourself minus your arm and legs. True, his arm and legs were real, but his memory of them was nothing like the memory your brain has of the things you experience. But you don't see yourself as something you don't own. There**
