
Ciel Fledge: A Daughter Raising Simulator Hacked

Story The game is set in post-apocalyptic Earth after a massive war between mutants and humans, resulting in a world full of irradiated zones, rat infested zones, toxic zones and such. Some years after the apocalypse, the world is a cold, cruel place. The humans are essentially overpopulated and have lost most of the common sense, let alone their decency. Just about anyone is allowed to steal from others, kidnap others, murder others and take what they want, with the exception of few. Mutants are like the humans, they can be kind or blood thirsty. If you cross them or get in their way, they will murder you without a second thought. The world you play in is huge and full of content. There are over 100 zones, all randomly generated at the beginning of each playthrough. The dungeons vary in size, shape, difficulty and depth, and the raider is usually present. The raider does not just slay monsters, they hunt. They wander aimlessly, they stumble upon a trap, they stumble upon a dead body or face a full blown ambush by a pack of wild animals. Then they loot the corpses to find useful items. Besides the raider, there are many other types of creatures. The mutants don't hunt humans, but there are always mutant lairs all over the map. The lairs are randomly generated and can contain many things. Walls, doors, stairs, trapdoors, teleporters, mutants, and lairs are all placed randomly. The things you find are your reward for killing things. There are many items that you can find in raider's body, but the raider often loses some of it. They can find many useful items on the corpses. Some are common, but many are rare. The raider can also find junk, rare items and artifacts. The raider may also encounter other creatures. Some are super-raiders, others are animals, some are humanoids, and even another raider. Features: Difficulty: There is no win condition. Instead you will have to adjust

your strategy to the dungeon you are in. You have to adapt to the current situation, and think from the raider's perspective. Constant Action: In a game like this, you will need to constantly move around, explore, find better weapons and spells, and find items, too. Dungeon Exploration: The dungeons are randomly generated. You have to explore and find what you

What's new in Ciel Fledge: A Daughter Raising Simulator:

If you bought a copy of the upcoming game Ciel Fledge (PC, Mac, Linux), have you gotten the message we've been hinting at for a few months? While it doesn't resolve any of the issues supposedly blocking its release, it's clear everyone involved is aware of the flak they've been taking on YouTube and other sites, its Ciel Fledge forums and official forums. That said, if you're logged in today and are sitting in the Ciel Fledge Steam page or on any Ciel Fledge Steam page, you'll see our main appeal for people to keep the faith and stick with it. I'd spent the last few months working on the game-almost against my better judgement, by the way-amassing a website and a Steam page, releasing a demo, other demos, chapters, and a story trailer on an \$8 budget. It's made being independent a rewarding experience, even if it's one I'm not entirely comfortable repeating. But, yeah, I was working on it and now it's almost done. If you like what you've seen and want to help us get it out there, I'd really appreciate the help. To that end, we've promoted the Ciel Fledge Steam page enough to convert people from people thinking it's broken, as well as attracting a few new folks from over 3,000 discounted in the past few days. As Ciel Fledge has been delayed before, it's vital we reach that 3,000 mark-our friends and beta testers are getting a bit antsy and it would take a significant number to stop their graph lines from pouring south at this point. While that's a very distant goal (several hundred discounted is more like it), we can still reach it. Obviously, given the level of interest on our forums, we're confident

there's enough of a core group of fans to help. Visit the Ciel Fledge forums over there (there's a link toward the top of the front page) and help your fellow JNS friends help us out a bit more. It's been a hard couple years for indie folk, what with the sad news from a few weeks ago. For those of you who don't follow my forums, my current question
