At Sledgehammer Games, we're extremely excited to bring this unprecedented feature to the FIFA franchise. We've added new gameplay aspects to ensure that players experience the thrill and excitement of being a top-class professional footballer. What's New in FIFA 22? The FIFA 22 "HyperMotion Technology" is more than a new physics engine - it's a new way of looking at, and playing, football. It allows you to make the most of your natural abilities and helps you better understand the best tactics and techniques for the modern game. FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay. At Sledgehammer Games, we're extremely excited to bring this unprecedented feature to the FIFA franchise. We've added new gameplay aspects to ensure that players experience the thrill and excitement of being a top-class professional footballer. We've added more than 2,000 new gameplay actions, more than 1,000 new animations, more than 750 facial animations and more than 30 additional animations for every player and team. We've also made the dribble animation more realistic and introduced new tricks to achieve spectacular goals in dribbling and scoring. +New gameplay aspects make the ball feel more responsive on every surface and allow you to master the art of the steal, ambush, dribble-via-tactics and press. +The FIFA 22 "HyperMotion Technology" was developed with the idea of creating a true, authentic "grass-roots" experience for a higher fidelity of the football world and is something that FIFA fans will enjoy. For example, pass-back control and the manner in which the ball falls once it's received by the player has been retuned to make the ball feel more natural, while crossing and defence options have been heavily refined to improve gameplay. +Tackles are more varied and realistic, reacting more dynamically and with greater force. AI defenders manage to read the game much better and react earlier, attacking the ball more aggressively and with greater determination. +The dribble animation has also been retuned and improved, offering more refined control and higher trajectory on

Fifa 22 Features Key:

- Introducing "HyperMotion Technology," used in Career Mode and FIFA Ultimate Team, which captures real-life athlete motions in the game during high-intensity football match play.
- More ways to earn points in the added "My Club" mode, which makes the user select their ideal playing environment - from the cover of the Gunners in London, to the bright lights of the El Clasico in La Liga, or the balmy heat of the Southern sides. Players can define an ideal playing environment by sculpting their stadium, style and kits. Each of these Customisation options give the user significant flexibility in creating the ultimate footballing fantasy.
- FIFA 22 introduces "Play the Game" Mode, a new mode that challenges players to tackle situations found on the pitch; Exemplified by the first goal dilemma and the mid-match penalty shot dilemma, both of which have been added to Career Mode.
- Top professional female players now join their male counterparts in Career Mode. FIFA Ultimate Team now accommodates players' unique attributes and gives players the ability to play in over 45 different kits and specially designed player faces, with new goals and special garments that build upon player attributes.
