videos with any CPU/

### What's New In?

Record your screen activity with ease Capture screenshots or record your webcam feed Annotate your recordings with custom text and images Share your creations to Facebook, YouTube or Google Drive Find your recordings faster with tags 100% free and legal software Download GOM Cam for macOS Getting the most out of GOM Cam [get the app](#) To record your screen activity with GOM Cam, you must first launch the app and make sure that you are connected to the Internet. Once you selected a recording mode, place the cursor over the area where you want to record the screen or grab the toolbar above the recording window and drag it towards the edges. The window will then be positioned where you want it to be. You can then start recording your screen activity by tapping the Record icon

---

located in the lower left corner. If you want to get started right away, you can use the tutorial video provided by GOM Cam to get acquainted with its features. Besides GOM Cam, there are hundreds of third-party apps for recording screen activity. This usually requires a bit more time and, with the exception of basic recording, the developers provide no tutorial videos. However, GOM Cam manages to get the most out of the screen recording functionality within OS X. Help us keep this channel alive by supporting us on Patreon!
