Some of the features of Photoshop are in the Creative Suite, so it makes sense to look at how you can access Photoshop's features by using the Creative Suite: Along with the Photoshop application, the Creative Suite includes a suite of programs for a variety of graphic-design and illustration tasks. Photoshop Elements (PE) is the Photoshop equivalent of the Painter program, with many of the same features as Photoshop. Illustrator, in the Creative Suite, provides features such as vector editing and Illustrator Exchange compatibility. Adobe Acrobat creates vector graphics and is used for page-layout and design tasks, as well as to create PDF files. Adobe Bridge offers a browser that enables you to search and browse all your files from a hard drive or the web, including web page images. SketchUp is a 3D web-designing and illustration program that includes features for laying out 3D objects, and exporting them as images for use on websites. Thanks to video tutorials available on the Internet, anyone can learn how to use Adobe software. These tutorials can be found by using a search engine, clicking the "Forum" link on the Adobe Web site (`www.adobe.com/products/creativesuite/ps_products_tutorials.html`), or searching Google for "Adobe Photoshop tutorials." ## Creating a New File Photoshop is a bit complicated to use in terms of opening a new document. The most straightforward way to open a new Photoshop document is to click the Open button or press Shift+Ctrl+O (Shift+Apple+O on a Mac). You can also right-click and choose File⇒New, as shown in Figure 2-1. FIGURE 2-1: Right-click to open the Open dialog box. You can change where the Photoshop file will open using the Open dialog box (displayed in Figure 2-1, which appears when you right-click the New Document icon). By default, new documents open in the Photoshop document window, as shown in Figure 2-2. Alternatively, you can choose to load the document into a new blank Photoshop window. Click the dialog box's OK button to save the new document. FIGURE 2-2: Load your new document into a new blank Photoshop window. Windows users can use the Save As command to get the same effects. Select the New icon at the top of the
