It's free, but you need to subscribe to a \$59/year Photoshop subscription to use the features of the professional version. Adobe Photoshop Elements - New Features You can access the new features in the full version of Photoshop Elements by upgrading. We'll also briefly describe the new features and go over their functionality. We'll be referring to the features by the numbering of the user interface. 1. Switch to Grid view The grid view is just a new way to find files and a new way to navigate the Elements interface. You can select a file in the list and then click the arrow next to the file to see its image. The file list is in the same folder structure as the folder you open the Elements application in. For example, if you open it in the Applications folder, you will see sub-folders by the name of their parent folders. The file list is read-only, so it won't show any changes made by the program to the files and folders. It is a handy navigation tool, though, as you can simply select a file to open it in the editor. To switch to the grid view, open the file's properties and click the Use Grid View checkbox. 2. Quick Selection The current file's selection is on the left side of the viewport. You can drag your mouse to do various operations on the image: You can move your selection to another file in the list. If there is text, you can put a selection around it. You can undo a selection in the previous level. You can make a selection bigger by stretching the selection anchor. You can make a selection smaller by shrinking the selection. 3. Adjustment Panel In the Adjustment panel, you can use various tools to modify the currently selected image. The panel is divided into 6 areas: Colors: Overlay, Levels, Curves, HSL. Clarity: Shadows, Highlights, Exposure. 05a79cecff

The application of the Act is presumptively valid, and the burden is upon the railroad to show that it is not in the public interest to apply the Act. *Far East Conference v. United States*, 342 U.S. 570, 574, 72 S.Ct. 492, 96 L.Ed. 576; *United States v. Illinois Central Railroad*, 303 U.S. 239, 241, 58 S.Ct. 533, 82 L.Ed. 773. All of the matters relied on by the defendants in support of their objections to the application of the Act have been considered by this Court and are without merit. 15 The defendants also claim that the Commission erred in finding that they are not within the zone of reasonableness in that the undercharge proposal must be reasonably related to actual savings that the carriers might realize by operating under the rule of reason. The argument is that § 2 (d) of the Act, which provides that it shall be unlawful for a common carrier 'to charge or receive a greater or less or different compensation for the transportation of passengers * * * than the rates, fares * * * prescribed in the tariffs when filed by such carrier,' is a
