In Fast and Furious 7 you have to drive an explosive car, at super high speed. You have to finish each stage, first by blowing up some scenery and then get the top score. If you like to play the game with friends and compete, then you should try out this game. Tested on iPhone 5 If you still are not sure whether Fast and Furious 7 deserves a five star rating, just read the reviews below. Fast and Furious 7 Mr Row 5.0/5 "If you ever wondered what Fast and Furious is like on the small screen then this is the game for you. You play as the fastest car racing game ever with more than 60 different types of cars." The only thing it lacks, is more cars. That is the only thing I am disappointed about. Otherwise its really good, and pretty easy. It has a great storyline and the graphics are more detailed than in other games, like Need for Speed. Newer Reviews Fast and Furious 7 TALLine 5.0/5 "Fast and Furious 7 is definitely worth a try as it's a good racing game offering graphics and gameplay right up to the standard. All the different stages are well designed and are a nice variety for the user to choose from. This game is a recommended one if you like car games." Even though the story is again strongly overrated, the game is perfect, and it has a lot of stuff in it. With a variety of driving, well designed stages, and customization possibilities you will not be disappointed. For all who have played the game, you will notice that the racing is entirely different. Everything has become a little bit more focused on destruction, a lot of cars are not driving around anymore but are split into little pieces, and the car you want to jump and get the highest score always is right in front of you. What make you play You can play the game by yourself or with a friend. It is not a racing game, but it is more like a fast-action car game. I have so far not found anything negative to say about this game. I have had very good experiences with it and it might become a genuine racing game for me as I can't stop playing it. It is a fantastic game with content but after about 20 levels I had to give up. I just could not get the hang of it.
