Dark\_Demon\_666 Brave 27th Jul 2016 This game is by far the best rogue like in the ever seen. I have played rogue like games in the past, but the things the developer made were mind blowing. It is sad to see that they had to block it on most platforms due to the arcade elements in the game. This is far from being a god game, but it is damn good. In my opinion it is pretty much as good as Diablo, nothing can touch that game. People should give this a try if they really like rogue like games! GREAT GAME angelsince86

by Tiger\_ROTnj Cute 27th Jul 2016 I would like to see some real improvements in the future. This game, at the time I bought it was a nice simple looking game and I enjoyed it but the problems that I had: 1) the level up system is brutal, if I did not level up my character 3 times this game would have been fun and playable. 2) I would like to see some secret missions; I was expecting some secret missions but the most I found was a secret quest.

by Ashtreepanda Funny 27th Jul 2016 The only complaint I could really think about is that the rom type doesn't work
