Star Gun ----- Star Gun is a simple space shooter with a mixture of arcade and

puzzle gameplay. You are the pilot of a spacecraft which is a small ship with a twin cannon that when fired at targets, automatically rotate back to a stow position. If you travel a certain way and collect items you will earn points and become the best at this game. Star Gun is based on asteroids that move back and forth and you must shoot them from space in order to destroy them. While there is a main campaign, you also have the ability to create your own levels and share them with your friends. -----

What's new:

Phase II UPDATE: Phase II has been completed.
UPDATE (March 8, 2014): Removed JavaScript in the question. Last fall, I posted the results of Phase I of the Astronational Society of Canada's Science Knowledge Level 2 (SK-L2) Space Personalization Project, where a few you reacted to my design and offered great feedback about how to improve it. I wanted to continue the project but by incorporating what you had told me during Phase I, I opted to go with a new approach. We are embarking on Phase II of our project. We have raised the \$2,600 to complete the sets this time around. Without further ado, here's the second-phase survey. Enjoy. Phase II Survey Descriptions: Phase II is a continuation of the first phase of the project, which was limited to

a "space pilot phase". Phase II continues the process of designing, building, and testing in order to test the final version of the design. This phase incorporates user feedback received through Phase I in order to improve and be ready for public consumption. Contents: A 10-item test is included in a single page survey (see below for instructions). Questions will test your knowledge of space and astronomy. We will attempt to design and build the set so that you are most likely to understand it. In theory, this should ensure you will understand it. However, if you have any questions or comments, let us know. Items of Interest: Astronomer: \$6 Random Astronomer: \$6 Rocket: \$6 Rocket Return to Home: \$6 Laser: \$6 Laser Mission: \$6 Satellites: \$6 Space Walk: \$6 Skipper/Hovercraft: \$6 Sky-Walker: \$6 Veikko and the Oterra: \$6 Launch Pad: \$6 You can answer the survey in any order. To analyze the answers, I have created labels for the answers using Survey Monkey's artificial intelligence. The labels can be downloaded in Excel or exported into a CSV file for importing into a spreadsheet or database program. Labels can be added together to create sets of numbers representing a "total knowledge score". The first letter at the end of each answer refers to instructions on how to submit:
