Download SmartGorilla auto trainer software free 2.2 or try it for free, with a no obligationÂ .Q: Matlab: when to use "mfilename" instead of "mfilename('fullpath')" When using Matlab, when to use the mfilename command and when to use mfilename('fullpath'). My main question is, when to use the path argument from the mfilename command? Is it the case that if the path argument matches the path of the current directory, the filename is returned as-is? A: The path argument is a general input argument that applies
