TECHNOLOGIES, ARTIFACTS, POTENTIAL METHODOLOGIES, AND TO ARRIVE AT
A MORE IN-DEPTH UNDERSTANDING OF HOW A GLOBAL SYSTEM
CONSTRUCTED AS A NETWORK OF INTERCONNECTING COMPUTER, SOFTWARE,
AND I.T. POTENTIAL SYSTEMS MEANS THAT WE CAN CREATE A SCIENTIFICALLY
BASED VISION OF THE FUTURE. As a new business opportunity there are
apparently several areas where this can be put to good use. 1. The basic
premise in all these fields is to transmit massive amounts of data in order to
come up with a more balanced understanding of the world. This is supported by
the term "Innovation". 1.1. The knowledge and experience of what happened in
the past, of what could happen in the future, or of what does not exist yet. 2.1.
The input of data about the world and its nature, as well as the help it may give
us to understand what is happening in it. 2.2. The removal or addition of data
from the world in an attempt to come closer to an understanding of what is
going on. 3.1. The development of tools and ways to be able to transmit and
find those units of information. 3.2. The extraction of data from the world or
systems development in order to make them intelligible. RECOMMENDED:
