In the Halloween Escape, experience a new type of roller coaster. Encourage as many people to play as you can. Total clear score for each level. How to Play: A or Left Arrow and D or Right Arrow to dodge obstacles. Shortcuts: If you are lucky, you can easily clear the first level. Save your lives and score points. Playful and Entertaining: Halloween Escape is enjoyable for people of all ages. About Dev Team: -Playful on Serious Games -Design every game with very detailed design and features. -Looking forward to feedback on our future games! A: Scoring for level 1 is: You get a score of 10 if you are last or whatever you make the last person fall off (don't know how many people it takes). I don't know the exact math but it gets you closer to 100 then if you 'randomly' chose the last person to get hit because it would be a very weird number... A: Level 1 Every person on the ride dies so the people are in a row and the person in the last seat ends up last... (or whatever you want it to be). If there are one-one hundred people then I would guess the score is around "100 (mathematically)" // Copyright 2011 Google Inc. MORPH KING is an arcade chess variant that has you control only one piece, but this piece is special: every time it moves, it morphs. Use this ability to outmaneuver predictable enemies, and don't let them swarm you! Gameplay On your turn, you'll move your only piece, then morph into a random piece type (you can see the next 3 morphs). On the enemy turn, every enemy will move in perfectly predictable ways. For every enemy you capture, you gain a score point, successive captures increase the points gained. If you get captured, you'll be locked as a King for some turns, if you're captured as a King, it's game over. Morph your way to victory in Normal and All Out challenges. Features Master the ability to morph and use it to escape sticky situations. Use a come-back mechanic creatively to not just avoid death, but take out pesky enemies. Determine the patterns of enemy pieces, then exploit them. Chase your high-scores in either static difficulties or escalating difficulties. Find creative solutions to

quickly beat randomized waves of enemies. Listen to piano covers of traditional Russian folk music. Attempt to last as long as you can in Impossible difficulty. Credits Most soundtrack pieces are by Sheet Music Boss, sound effects are retrieved from various royalty free SFX sites. About Developer MORPH KING was conceived, developed, designed and programmed by myself: Steven Allen, an indie developer and creator of the game engine Lumberyard. Developing indie games on my own helps me keep up with the pace of game development, and give me the chance to iterate over, revise and build upon the programming I put into MORPH KING. For example, when I developed the alpha test for MORPH KING (which was tested by two friends), I was able to make the balance and the experience richer by working on the mechanics. If you've never played MORPH KING before, it's easy to pick up and play. It's designed to be re-playable at a moment's notice, but you can also practice along to piano music and gain some extra skills along the way. My personal experience was that I picked it up after playing 10-15 games, and I feel like I have a solid understanding of the basic mechanics. MORPH KING
