Hero's Quest - Lost Legends, Act 1: Hunt for the Dragon is a multi-layered, browser-based RPG in the vein of Final Fantasy IX, but with a fresh new look. Set in the land of Empar, do you want to be a hero or a villain? With a big and bold new upgrade to the classic turn-based combat system, you'll have to fight enemies to uncover ancient secrets, while earning points to unlock new abilities. Beyond the fun combat there are dozens of side quests, mini-games and puzzles to dive into, and in the days after the main story ends you can step back into the role of the main character as new features and story-lines unfold. A brave and new world. It's up to you. Play Hero's Quest, the first game in the new five-part story. Game Features: Endless sidequests and quests for all heroes. Attack and defense are at the heart of combat. Battle and explore unique locations and environments. Define your own unique Hero and his/her body and abilities. A new and improved turn-based system. Over 30 different enemy types, all with detailed and 3D graphics. Classic anime and manga-style illustrations and CG cutscenes. Creative player-controlled battle scenes. Fast paced gameplay, suitable for all ages. "Hero's Quest is the first in a new line of browser-based RPG games. It's a non-linear RPG where you'll move from quest to quest in order to make your way to the final location. This is a game with the "open-world" feel, where you're free to explore or do what you please. This is a game where you can't go to a quest with a specific goal and get your back-side handed to you, you'll have to work your way through the levels. At first, it'll look like you're on the surface, but from a certain point on you'll discover a level that's been cut off from the others." (AKIBA Digital Media). Story The land of Empar has been overrun by the spell-casting beast, Dragon. In order to defeat Dragon, the great

What's new in FIGHTING EX LAYER - Color Gold Silver: Hayate:

"N.Y.C. has been one of the safest cities in the world for over a decade... From the start, had an enforcement problem with me... I was seeing NYPD from line-to-line in an armored vehicle... Jerks asked me what I was doing in N.Y.C. They said I was mental... I said 'Mental, really? You don't know the word mental? I mean, I'm half black, uh... Are you jealous?'... They said, 'no.' I said, 'are you black' and they told me, 'no...' I said, 'are you black, or am I crazy?' and they said, 'no.'...they started to understand that I was mental. They couldn't take anything from me. One day I pulled a sidearm on them and told them that this was my free City 'cause I didn't have to show anything, or carry anything. They said there was a threat report. I had two D-holds... So I said, 'Thank you, buster. Have a good shift. They never called it a threat report. It's a hate report. They hate me for being black and threatening them with a gun. They never removed the report from my file... Only thing they could do was hire a lawyer... They hired a lawyer and they are now suing me in small claims court...I was being strong armed by the highest paid police in N.Y.C. I wanted to get out of this city" Looks like my video is no longer available. People sitting this one out might need to be brought up to speed. The typical bright pixie that just doesn't get it. Yes the smart like out there all want to know how to protect their nation with their politics but are clueless about what is going on. That means they are more likely to oppose critical thinking while in the womb than to really keep up with what's going on. They all want to think that is because they are so informed. And while they are screaming about how informed they are they will never realize how well informed the far right is about them and how they have to have everything in line for a one world government. However the puffs in the loud

Obviously the renderer is an early prototype and I still have a lot of texture and model work to do to make it feel like the game, but it looks fine so far. Pretty good idea to set it up this way though. I think I might upgrade to a newer engine version so I can do that again. Dean Added 25 February 2013, 17:38 Awesome! I know you have like a whole workshop full of stuff so I wouldn't be too surprised if we had a new game some time soon. I'd love to play a new Doom 3. Scully Added 25 February 2013, 17:41 I'll be concentrating on getting the feel of the game to work nicely for awhile. Once I'm happy with that I'll start porting a mod of the mod, which means I don't have to port every individual unit, and more importantly I can make mod-specific changes that don't affect the code base too much (since it's just a retexturing of the existing models). Not to mention that making mods gives me some extra budget to work with, so I can buy lots of cool stuff.Otters are larger and more curious than minks, thought to be the first mammal to colonize the continent.
