With the help of your companion Squire, you'll embark on epic adventures, face epic battles, and earn riches and prizes you can use to create a prosperous and happy life. The existence of Granado Espada is regulated by a law of evolution that has prevailed for hundreds of years. Each new generation represents a new beginning. Each new generation unearths new powers, new places to explore, and a new set of challenges to face. Players begin their journey with four companions, but it's your choice to explore what your life's journey will be and which characters you will discover along the way. At the beginning of the game, every character is locked at level 5. When you level up, your characters will follow you around and gain experience as well. You can play the game with your current level 5 companions, or you can recruit new companions who are at level 5. Players can invite their friends over to Granado Espada and collaborate on completing special quests. If two players collaborate, one will be considered the leader, and his or her companions can attack or defend their leader. The leader can also call in reinforcements to participate in special events. Aquatic Adventure. Exploring Granado Espada is a life-like experience. You can walk and interact with different objects, creatures, characters, and more. Granado Espada features an aqua world with over 100 areas to explore. - Big Fish Games: "Big Fish Game Studios was founded on the simple idea that everyone loves stories," says Jack Sommersby, CEO of Big Fish Games. "Big Fish Story is what makes the company great. It's what the Big Fish Games community is built around and it's what we want the community to build games around."
 - Ecchi-Straight: "While actually encouraging silly sexual content, we tried to appeal to an overly horny audience with a bit of twisted goodness," says Jack Sommersby, CEO of Big Fish Games. Big Fish believes there's room for both, and gamers should decide which one they like. Basically, we make a simulation game and provide a framework for coders to add their evil to the world."
 - Free Games: "The majority of people who buy an Internet browser firefox don't register an account with it. With a few exceptions, they don't intend to. Big Fish Games is all about short-term activities, such as using an Internet browser to look up information. Most of the games put out by Big Fish Games are little more than toys, but we do aim at delivering a few great experiences worth sharing and all sorts of fun experiences for busy people."

Hallax In "The Lions Unleashed", Seaguy posits that the first thumb was a mutated pterosaur living among the dinosaurs, "the dino-roach".
