**. "No. You are missing the picture. Look at the wind." He frowned at me, uncertain. "Daphne would not ask me to risk Anaïs until it was time, she wanted this to come between me and Anaïs. She wouldn't even get pregnant until my back was turned. We had to plan this ahead, secretly, husband and wife. Daphne is in no fit state to be a mother. When I went to Francis, Daphne told me Anaïs was at Americana—Emma and Fox kept her hostage there—only Anaïs is untouched: broken, confused, intelligent, and sad. When Daphne gave me the papers to show to Anaïs, she already had her in the palm of her hand, ready to give up her hard-earned safe life. And how do you think Anaïs would have received me, a woman who abandoned her? Daphne wanted to display the gratitude of her new husband, of the woman he rescued from a life of misery and found herself reborn as a Chevalier-Socialiste. Knowing Daphne, and she knew me, this was her plan—and, by this time, we are back in her world. Rehearsed, choreographed, planned in the manner that Daphne is." "I'm not so sure of that." "You know very well what I am saying. Daphne loves me, if not me the way she loves you. Oh God, that didn't come out right." "You think she fed you that story about how I broke her heart." "You know what I mean. She would never hurt you the way she hurt me, and she has shown enough of a maternal side to convince you and make me look like an exploité. The pity shot—" "Oh, Greg. You're a little shit." "Yes, I am. But here comes your first test. Anaïs is the heroine. This has to convince you that Daphne did love me, and was enchanted by me for the first time in her life. We didn't get sentimental over this, just business. It was about how much romance was left in Daphne and giving us all a thrill." "You think she wants to thrill me? Or you?" I laughed. "You and she have been through enough together. I'm just the**

Cybxus Hearts is a game I played when I was a kid. It has a good story and tight gameplay. This is a game where you control three different characters and attack enemy bullets simultaneously. You can swap between characters depending on the situation. And protect your central core with the all cost! The game has a variety of modes such as survival mode, single player mode, and multiplayer mode! In this game you have to pass through a variety of settings, and you can tackle several different enemies. I think that what I should say is "Everything that I think is really great".

**Gameplay** This game has an interesting battle system where you control three different characters that belong to a pair. One pair is stronger than the other. You can swap them depending on the situation in battle. For example, the weaker of a pair is a young man wearing a red suit. You can use him to survive the enemy bullets. The second pair is a young girl wearing a blue suit. This pair is the strongest and you can use them against the enemy. The third pair is an old man wearing a blue suit. This pair is still strong. You can fight with the enemy bullets by controlling all of them at once. The battle system in Cybxus Hearts is inspired by the classic Japanese shooting game, "Cybxus". The game has 4 stages that have all different patterns of bullets that are flowing. You can move through this area with the character. There are a variety of enemies and bullets that are attacking in battle. You can fight against these enemies with your character in order to survive. As the game progresses, you can obtain new kinds of power from the boss while fighting against enemies. You can change the color of your suit and weapons. These are also useful in battle. Weapons that you can use in the game are guns, grenades, and bombs. There is also special weapons and a healing elixir. You can use them to defeat the enemies in battle.

**Story** The world in this game is divided into 3 pairs of adventurers. Each pair has 2 characters in the game. The game has a story of these 3 pairs in which they are travelling together. If they lose, they are separated from one another. As a result of losing, you can obtain a new partner. This is one of the things that are good in the game. The setting of the game changes depending on the character's suit color. You play
