VR is a tactile reality. Headtracking in VR allows you to look around the environment. VR is immersive. That means it feels like you really are there, and that it becomes real. PlayStation VR is the first VR platform that brings the feeling of

being in a world where you can reach out and do things. Morpheus, the digital character in the sci-fi film Arrival, represents the power of the VR experience.

PS4 The PS4 is a powerful gaming console. It features an operating system that delivers exceptional graphic quality for a range of new and traditional games. It is also a powerful, yet small and light, portable gaming platform that is capable of connecting to your home via its built-in Wi-Fi network.

Technological breakthroughs With the PS4, Sony has managed to merge the beautiful hardware of the PS4 console with the most advanced technology in virtual reality. Sony has been pushing the limits of the hardware to make it capable of reaching a high level of performance. We are also harnessing the power of 3D video gaming which allows us to store as much information as possible on the screen. Sunlight Defect has harnessed the full power of innovation, technology and science to make VR into a reality.

Sixth senses The camera offers the player an incredible way to interact and play with the PS4 using their body and their sense of sight.

Hand-held controllers The PS4 is the first ever console to be able to detect your hand

Features Key:

Players take turns defending a remote beacon from the evil *Chaos Horde* who want nothing more than to complete the ritual to return to the dark age.

Several zones lead off from the beacon with their *chaos* henchmen lurking about. Foe to player matches turn in one of these zones until 10 pawns are left defending, then the player who wins the zone wins.

When the final 10 pawns are left defending a zone, they release a bomb that sends the surrounding area back in time to the ancient world.

This game contains two decks: one deck is those whose victory is swift but short-lived (more like the Horde's campaign), and the other is those whose victory is slow, insidious, and long lasting (like the humans' campaign).

Weapons: only four weapon cards are unleashed at once, each causing the *Chaos Horde* pawns to remain in place and their *Chaos Veteran* henchmen to pile up in the area, protecting the *hand* which you control the pawns that remain to defend the beacon.

If you play your weapons correctly and fast, you may destroy the Chaos Horde's unholy ability to return to the dark age.

The authors of **Beyond Arm's Reach** are following our design with **Way of the Hundred Knights**. According to the rules on the Kickstarter page, **Way of the Hundred Knights** has been a 100-hour campaign (\$40 a month, with a cool bonus you only get when you pledge late). Perhaps this is one of the inspirations for making **Way of the Hundred Knights** a **PayPal**-dependent game-- for those generous enough to pledge through PayPal, you win the game free and your name goes on the credits before the
