Use Trim In Place and Snap to any edge or edge point, in full 3D, including transparent objects. **Improved 2D annotation:** Schematic components, angles, and dimensions can now be annotated directly on drawings, in 2D. **2D dimension:** Apply 2D dimension annotations to parts in your drawings to quickly reference and annotate parts and assemblies. **Light and dark pick:** Identify problem areas on your drawings more easily by picking colors on the drawing surface. **Select and align:** Select objects in multiple drawings and align them with a single click. **Align with object:** Use the new

align to selected object command to quickly align two or more objects, without erasing and redrawing. Reference tool: Draw a circle on the drawing surface to snap to a point in the 3D space, anywhere on the drawing surface. Snap to: Place and align components in drawings more easily using the New Snap to command. Snap-off and snap-on: Use the new Add-ons and Remove tool to quickly set snaps for components in drawings and hide and show the snap-on and snap-off commands. Lock and unlock: Set and lock, or unlock, your drawing features. Auto-grab: Drag a reference point or surface onto a drawing, automatically snap to that surface and lock the drawing features. Copy and paste: Copy your annotation or dimension and paste it anywhere in your drawing. Solid lines: Draw horizontal and vertical dashed lines.
