What's New In?

Drafting with Content: Rapidly share content with others. Use embedded images, tables, and drawings to deliver content in your drawings. Give your customers and collaborators the tools they need to collaborate with your design project. (video: 2:35 min.) Link from mobile to desktop: Create an

AutoCAD drawing and choose a view from your mobile device to display on your computer screen. Links are natively supported for mobile devices running iOS and Android OS. Linking to desktop is supported through an iOS only extension. (video: 1:55 min.)

Secure Annotate: Prevent inadvertent edits by leveraging the security of the document. Simply mark a lock over a particular annotation to protect that section of the drawing. When sharing a drawing, people can easily review and approve or reject annotations

without leaving the drawing. (video: 2:00 min.) Batch versions: Create multiple, parallel versions of the same drawing. Start a new drawing and make parallel drawing changes simultaneously. You can also get rid of multiple versions of a drawing that you don't need by using the "purge drawing" command. (video: 1:25 min.) New customizable collections: Organize collections by groups or folders. Consolidate files for easier review and access. Keep your parts on their own page or arrange them in groups for improved navigation. (video: 1:45

min.) Improved decision-making: Make sense of the information you're reviewing. Easily filter, sort, and find items. You can quickly jump to key terms, remove everything, or instantly drill down to more detail. (video: 1:15 min.) Saving: Be more efficient with your drawings. A new Drafting Defaults tool allows you to define drawing defaults that you can apply to all your drawings. To customize, select your drawing and then choose the drawing settings tab. (video: 1:30 min.) Watertight Drawings: Don't spend time editing and re-editing

your drawings to remove submerged objects. Create a coordinate-agnostic set of object properties to automatically prevent the drawing from sinking or floating, based on objects' locations. (video: 1:55 min.) Add a pen to annotations: Mark up annotations with a pen to communicate additional information or draw attention to a section of the drawing. Easily
