Roblox is a game engine used for designing video games. All of the games on Roblox are programmed in a language called "Lua." And the basic idea of the Roblox platform is that games are designed in a programming language, which makes it easier for users to make new games. The best part of the Roblox platform is that almost all of the games it hosts are free to play. Other platforms have taken measures to restrict how kids use their apps for fear of running into issues that could ruin their business. Roblox has a policy which says that kids will only be allowed to buy Robux (an in-game purchase currency) to make purchases on the platform. Roblox also has a policy of only allowing users to make accounts after they've reached 12 years of age. Roblox's main revenue source comes from ads, which is standard for most games on the platform. When a user buys a Robux item on the platform, they will receive a piece of content. By creating an item with an animated avatar and granting a title to it, developers can promote their video game on the platform. Roblox has a system to control which developers can create games on the platform. Roblox is a proprietary platform, meaning that it is owned by another company. The original creators of Roblox, Roblox Corporation, was founded in 2014 and is headquartered in San Mateo, California. Roblox was founded by Eric Cassel (CEO) and David Baszucki (founder). Career Opportunities: If you are a programmer you have found the right place for a jobs, because with Roblox you have huge growth opportunities. Although, you will need a lot of experience in programming, an idea and creativity, something that you create by yourself, you will be rewarded through your experiences. Things you will need to learn: HTML5, PHP, CSS, JavaScript, Git, Node.js, JQuery If you want to make your ideas come to life, you can create your own games on the Roblox platform and teach people about your game. And you can also make your own video game, from the start until the end, you can work with people from all over the world, helping you learn new skills, making sure your games are great. Are you a game developer? Are you tired of the traditional way of making your games? I'll be honest with you
