Q: Cartesian product of an 'array' of objects I have an array with N objects, each with a different number of attributes that must always be joined using a left join. The first elements of the array are joined using a left join, and the last elements of the array are joined with "AND". In this way I get a result in which the attributes of every object are joined using the first part of the array, and the attributes of the last objects are joined using the last part of the array. //A1; A2; A3; A4 //B1; B2; B3; B4 //C1; C2; C3; C4 //...
