The Scene Every few months, there's a new version of Final Cut Pro X: Apple's entry-level editing software, which debuted in January as the Mac's fastest video editor, comes in two different versions: one for. We've been using the \$299 "Pro" version since June for our New York Times tech blog, for example, while for video. 9/18/2015 . Apple released the latest version of Final Cut Pro X on Wednesday, and it includes a new feature called "Multi-cam." Apple's medium-priced software lets users edit a wide variety of different video types—all they need is a camera with a USB port. But Final Cut Pro X hasn't always been reliable when it comes to video editing. Final Cut Pro has been the standard for people looking to edit a little video on their computers, but it's been a struggle for Apple to update it since the first version for Macs . For all the praise the software still gets from professionals, Apple's weakest point has always been the video editing interface, which is . Since we launched the New York Times tech blog last year, we've been using the \$299 "Pro" version of Final Cut Pro X for our tech videos. After a while, we started noticing quirks in. the software seemed to be reverting to "Beta" mode when closing or switching between videos, and the previews didn't have a timecode. Even though these problems didn't seem especially severe, we decided that we'd try the \$649 "Premiere" version instead. the basics The most obvious change . the software seems better equipped to edit videos that are longer than 30 minutes and it has some new editing features that premiere includes, like a "multi-cam" mode and a more sophisticated scrubbing tool that lets you scrub through timecode (though you can also scrub through timecode in pro). The software has some other changes that improve usability and stability, like the much-requested video preview feature (although we noticed that it still does a. 6d1f23a050
