environment, you can edit the models of your building, move and rotate geometry, create surfaces, link entities, and annotate them. you can't place the editing tools, but you can add a reference point by clicking the arrow buttons in the upper-left corner of the viewport. you can also build and edit a section view, switch between the drafting and 3d environments, and create a new document. in the task list, you can quickly add components, such as walls, floors, beams, and columns. you can make changes to the viewport and make selections with the freehand drawing tool, which can be used in the 3d environment.
