Using Collections.sort() in a loop My question is
simple. I'm making a program for a whole week
that is going to search for a string (say, "snake")
and I would like my program to first sort all the
sentences in the text file (The text file has many
lines of sentences) into a List and then print the

output, or something like that. I have managed to get the numbers of sentences in the text file but I don't know how to insert them into the List. Here is my code:

```
private static List sortConcorde
(String in) { ArrayList concordant = new
ArrayList (); Scanner discFile = new
Scanner(new File(in)); while
(discFile.hasNextLine()) { String line =
discFile.nextLine(); if (line.contains("snake"))
```
